What?

- Respondents were asked about their Hajj experience, whether they used any app during their hajj
- They were asked about what features they would like to have in the Hajj app

When?

May 13 and May 14

Where?

Boomerang Digital

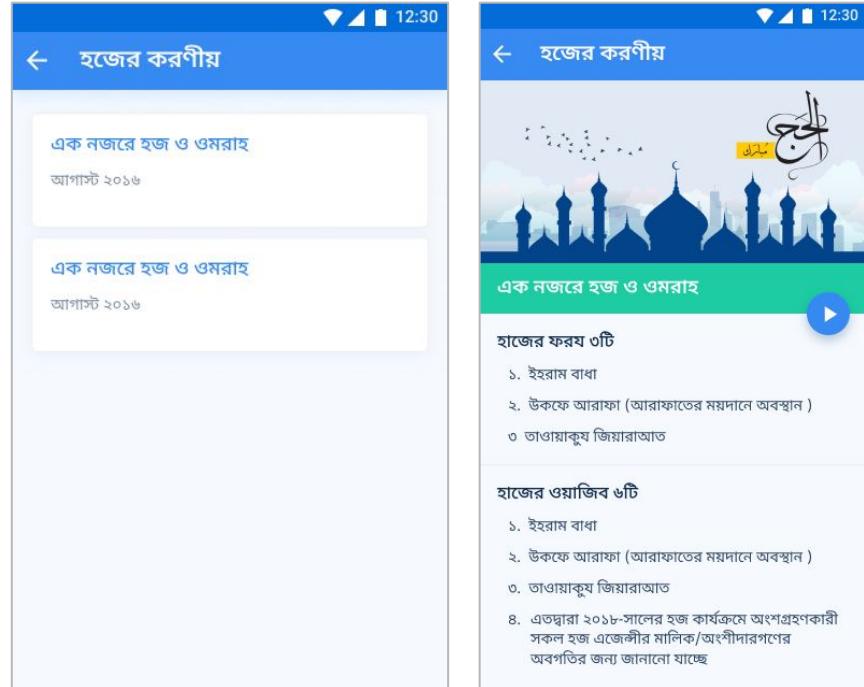

How?

One-to-one telephone Interviews lasting about 5 minutes each.

Suggested Features

Hajj Process

- Users will be given a visual guide of the whole Hajj Process such as what to do, when to do and which places to visit.
- One approach could be separate cards for each and every important step
- Once clicked a detailed view of the step will be shown

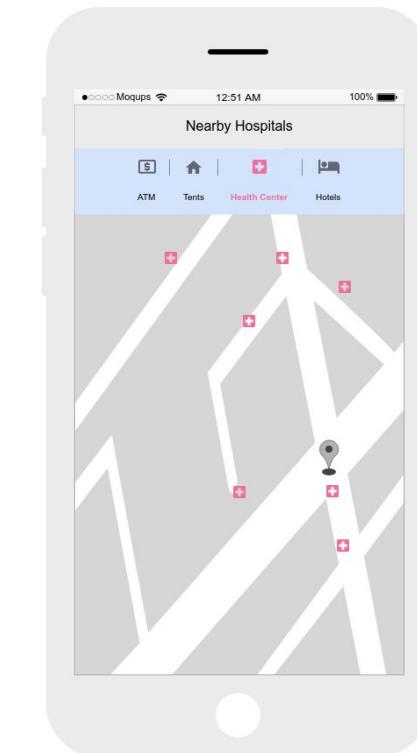

* These are just samples

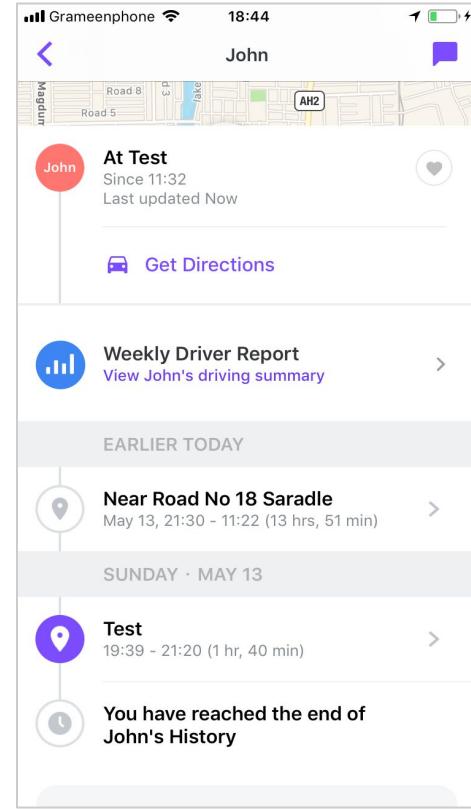

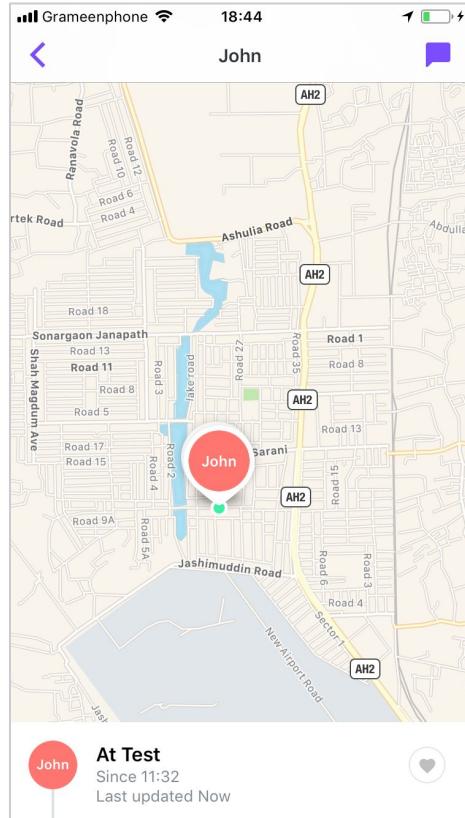

Direction - Tent / Hospital/ATM Tracker

- On this screen , users should be able to Locate his tent (app should get the info from his Pilgrim ID)
- Users should be able to see the Nearby ATMs/ Hospitals

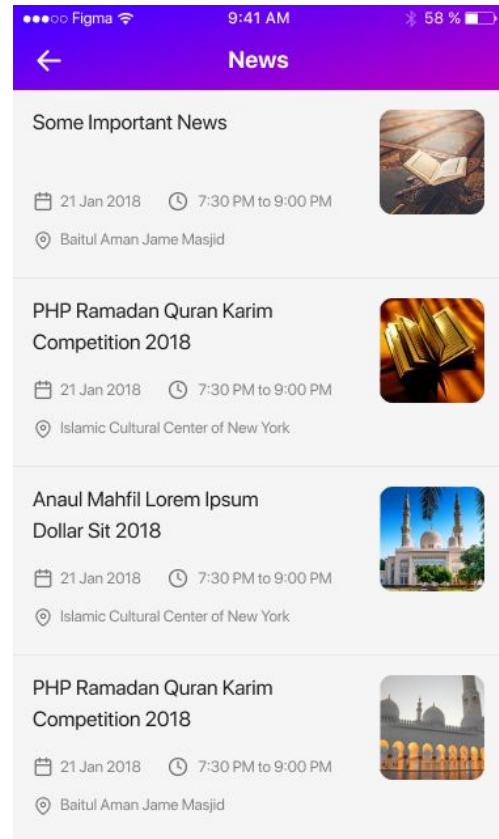

Share My Location

- User can share his/her location with specific people (eg. Relative, Guide etc)
- If someone is lost / in distress , s/he can be found from his/her last known location

News/ Important Information

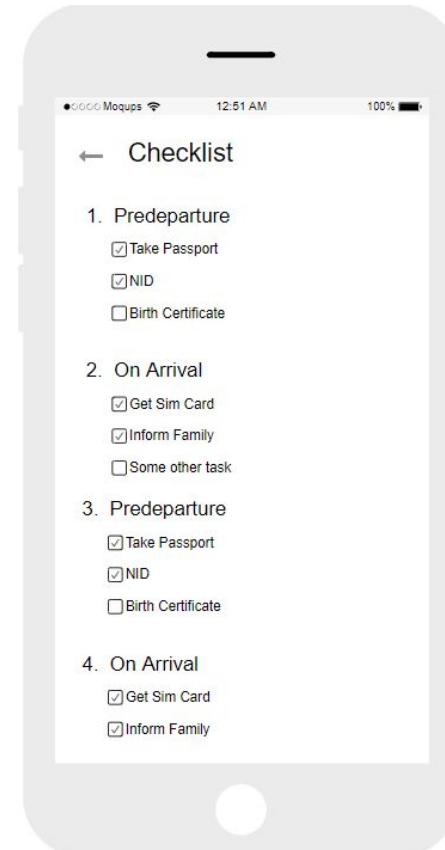

- Page where the users can view all the news in chronological order
- Once clicked the users can see the detailed news.

Checklist

- This will be a list for pre-departure to Hajj
- There will be Different Sections
- For example, we can have a section named Must Have Documents. That section will have checkboxes with Passport, NID and so on.

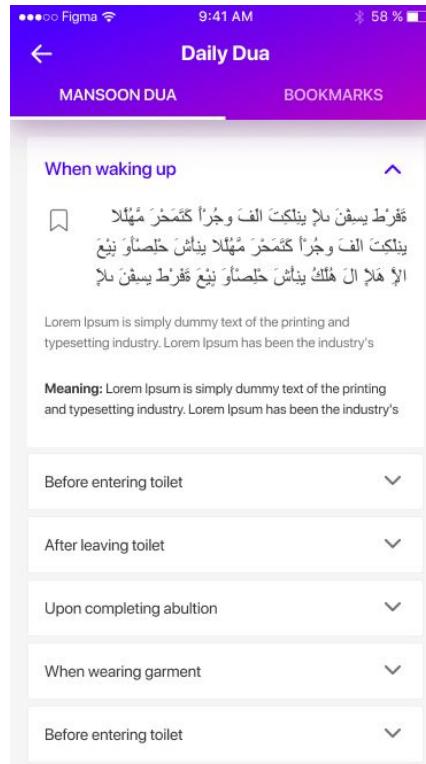

Quran

- List of Surahs
- Once tapped, users will be taken to the specific Surah
- Option for audio, pause, resume, bookmark

Dua

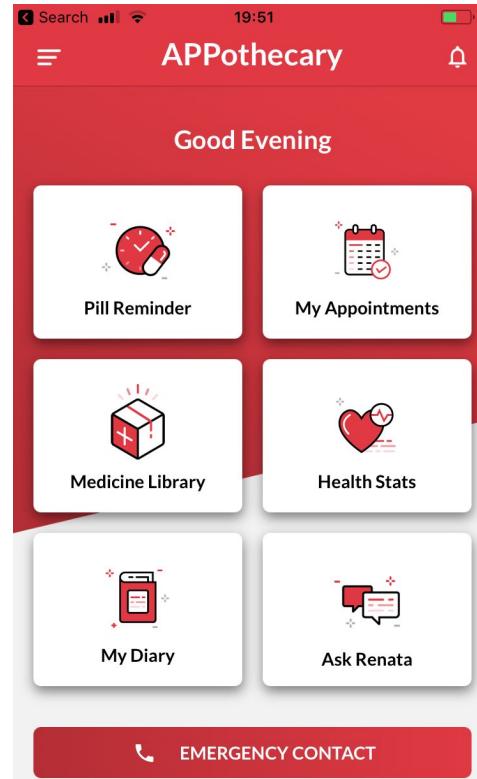

- List of Duas
- Once tapped , users can see the whole dua in Arabic along with the translation

* This is just a sample

Emergency Contacts

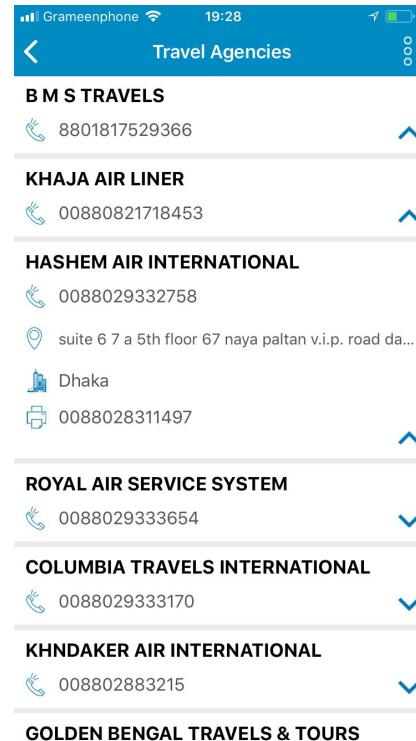

- We could have a prominent button in the Home screen (See the adjacent image for reference)
- Users can add 3 Emergency Contacts
- Once the user presses the Emergency Button, Primary contact (eg. the Hajj Guide) will get a call.
- Others will get a text

Hajj Agencies

- User should be able to search any particular agencies
- Tapping on an agency will bring up the short details of that agency.
- As this is not directly Hajj related, this could be a Hamburger Menu item.

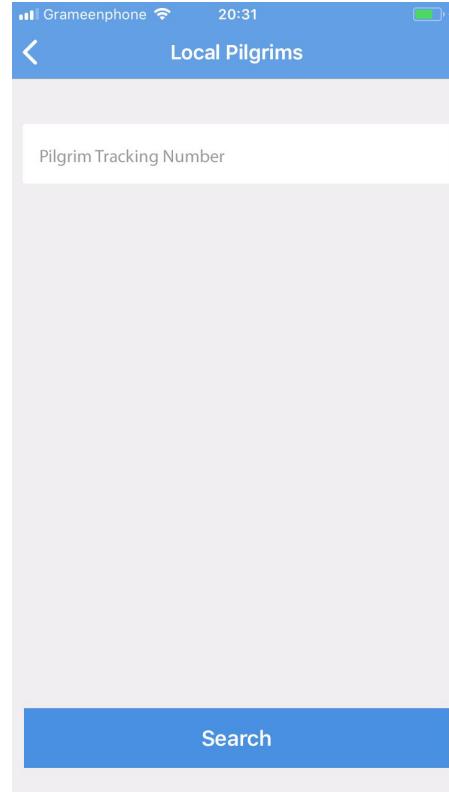

* This is just a sample

Pilgrim Tracker

- Users should be able to search by Pilgrim Tracking Number just like the website
- This will give the users a seamless user experience
- In future we suggest you to include almost all the important features from the website. This will ensure a one stop solution.

* This is just a sample

Other Features

- Prayer times: App should produce location based prayer times
- Qibla : To locate Qibla direction
- Historic Places: List of historic places with details and direction

* This is just a sample

Next Course of Action

Next Course of Action

- We request a physical / Skype meeting with the stakeholders
- This will help us to understand the requirements of the app clearly
- Once the features are finalised, we can start working on the wireframe immediately.
